Search Query for Millenium Falcon

<https://swapi.dev/api/starships/10/?searcher=millenium>

PART 2

1. Check if the POST request accept params, queries, and/or a body. Which one(s) and what information is it expecting to be sent?

Accepts a body with text body.req.text, it is expecting a text input

2. What data type does the GET request return?

An array

3. What would the URL look like for deleting the post with the id 555? (This post does not exist anymore, but the syntax is the same for existing posts,)

<https://practiceapi.devmountain.com/api/posts?id=555>

4. List the possible response codes from the GET request at '/posts/filter'

Code 200 and Code 409

5. Create a post whose text is your name, record the URL and body here:

<https://practiceapi.devmountain.com/api/posts>

```
{  
  "id": 30,  
  "text": "Bill",  
  "date": "13 Oct 2021"}
```

6. What would the URL and body object be to update the post you just made to contain your favorite color instead of your name?

<https://practiceapi.devmountain.com/api/posts?id=69>

```
{  
  "text": "RED is my favorite color"  
}
```

7. What is the URL to get posts that contain the text "blue"?

<https://practiceapi.devmountain.com/api/posts/filter?text=blue>

8. Make a request to GET all the posts. What are the content type and charset of the response? (Hint: look on the Headers)

application/json; charset=utf-8

9. What would cause a PUT request to return a 409 status?

Anytime you do not input the correct required query request.

10. **What happens if you try to send a query in the GET request URL? Why do you get that response?**

You get a 404 response as you haven't defined the information you are
